Eric –

I received your voice mail with the update on the request by CARE for access and sampling of the YVD wells; thank you for your follow-up.

Regarding the tubing; I propose that the ARCADIS representative open the well, remove the tubing, allow CARE access for sampling, return the tubing to the well, and close the well.

Regarding the access request, ARCADIS is relying on EPA's review of the CARE well sampling QAPP to ensure its technical thoroughness. Based on our earlier conversation, I understood that EPA would exercise a diligent review process regarding CARE's sampling plan. ARCADIS has not seen the CARE QAPP; we have no knowledge of proposed sampling methods, volumes, analytes, or sample handling and transport protocol. We assume that the CARE QAPP will need to follow the EPA QAPP standards (QA/G-5, QA/R-5 and QA/G-4). ARCADIS's concern is that the expedited review request made by CARE will short-circuit the review process, and allow for sampling methods/protocols that could potentially impact our future work under the AOC. CARE's lack of planning is not ARCADIS' or EPA's responsibility; our responsibility is to ensure that the work performed using these wells meets the standard of care agreed upon through the AOC.

We request that EPA use the same level of diligence and supervision when responding to the CARE request that is applied to the work performed by YVD and ARCADIS.

Respectfully,
